To Whom It May Concern

RE: Mid-Continental Restoration Company, Inc.

This purpose of this letter is to provide my strongest recommendation to you regarding the qualifications of Mid-Continental Restoration Company, Inc. (MCR) to perform masonry restoration and concrete repair services on existing buildings and structures.

I have recently worked with MCR on major exterior masonry and concrete restoration projects involving two, 21-story, high-rise residential buildings in the Country Club Plaza region of Kansas City, MO, and have consulted with them on a number of other smaller projects. My role in these projects has been as the Structural Engineer of Record, serving as a direct liaison between the building owner and MCR.

MCR has provided exceptional, high quality service on each of these engagements. Their individual workmen and craftsmen are conscientious and quite competent in their respective trades, and have a sense of pride in their work that is quite rare in this industry. Their onsite Foreman has consistently provided a level of hands-on oversight and project management that has absolutely minimized the amount of involvement required by my office to see that the work was done in a workmanlike and professional manner, in conformance with my plans and specifications. Their Foreman and Project Manager have quietly and consistently provided excellent service and response to both myself and the onsite Building Manager and her staff. Most importantly, MCR has delivered these major projects on time, and either on or under budget, even when faced with working through adverse weather conditions.

I have over 38 years of experience in this field, with twenty-eight of those in the major Chicago market. MCR ranks among the most competent restoration firms that I have ever worked with. They have my strongest recommendation and endorsement.

Thank you and please contact me directly at 816-531-2666 with any questions.

Respectfully submitted,

THOS. REWERTS & CO., LLC
